

# INDUSTRIAL DESCALER

## Description

The Industrial Descaler is a synthetic industrial detergent of unbeatable characteristics, with descaler, disperser and emulsifier properties. Specially developed for cleaning in car washes, tunnels and bridges, glass or plastic screens, metal parts without corrosion protection, sinks, toilets, faucets, tiles, facades, or cement floors, and all types of surfaces prone to adhesion of lime, oxide or grease.

## How to Use

- Depending on the amount of dirt, we can use the descaler with or without diluting it in water.
- For usual use, spray directly on the surface that is to be cleaned.
- After pouring the descaler, leave it for 3 to 10 minutes to be able to act, and finally rinse with pressurized water.
- Do not mix with other industrial cleaning products

## Technical Characteristics

- Thick texture.
- Pleasant aroma.
- Colourless, in contact with sunlight degrades to brown.
- PH: 13 (basic or alkaline)
- It is not flammable or explosive.
- It does not require respiratory protection, although it should be handled with protective gloves made of latex, avoiding contact with skin and eyes.

## Safety and Handling

Do not eat it. Keep and store under cover and out of reach of children. Irritating to skin.

In case of contact with eyes, wash immediately with plenty of water. In case of skin contact, wash thoroughly with water. In case of an accident, consult with the toxicological service (Telephone +34 915 62 04 20).
