

ROLLER CONVEYOR

The roller conveyor is an industrial cylindrical brush system for the transport of light pieces. It achieves a smooth, safe and silent transport of pieces and reduces the degree of soiling of the pieces. It is especially suitable for the transport of delicate or sensitive products, as well as those cases in which it is necessary to avoid the surface adhesion of impurities.

Supplied with 2 m C-rail mounted with 30 / 60 mini transport brush rollers

2 m C-rail 30 mini rollers

2 m C-rail 60 mini rollers

Product data

Body material	Polyoxymethylene
Body colour	Black
Fibre material	Polyamide 6 (PA6)
Fibre colour	black / smooth
Inner diameter	3
Total diameter	30
Body diameter	21
Fibre diameter	0,20
Support diameter	26
