

WWTP CLEANING SYSTEM

The cleaner for the wastewater outflow channel of the WWTP decanters is a machine specially designed to make a complete self-cleaning of the algae coming out of the water outflow channel, to keep it permanently totally clean.

FORM OF USE

The equipment is mounted on the bridge, its position is adjusted so that the brushes clean the walls of the decanter where the dirt accumulates and it does all the work constantly, without motors or extra energy consumption.

of the WWTP cleaner

TECHNICAL DATA

- Stainless steel structure, quality to choose between AISI 304L EN 1.4307 and AISI 316L EN 1.4404.
- Tubular structure with a diameter of 30 mm.
- Industrial technical brushes, reaching the corners, very high density.
- Spring system for the brush to put pressure on the panel.
- Very effective cleaning.
- Stainless steel tubular connectors for maximum regulation of the dimensions to adapt to the dimensions of each waste water outlet channel.

TO CHOOSE

- Stainless steel quality, in sheets and structure: AISI 304L EN 1.4307 or AISI 316L EN 1.4404.
- Brush sizes.
- Spring adjustment, or fixed brush position.
